-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1-10-05 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 14-18, and 23 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicants claim a reactive additive selected from TiO_2 , WO_3 and MoO_3 however it is clear from the disclosure that these additives are not present in the sintered body, they form TiN or the respective silicides. Note claim 14 claims a grain boundary, which requires a sintered body as well as claim 23, requires a low porosity. Furthermore it is not clear where there is support for the combination of SiC or TiCN with one of TiO_2 , WO_3 and MoO_3 .

Art Unit: 1755

Conclusion

4. The rejections over the prior art references are withdrawn in view of the amendment requiring one of the phases selected from TiO_2 , WO_3 and MoO_3 , which is not taught or fairly suggested in the prior art. Although this amendment is not considered to be supported by the instant disclosure the rejections are withdrawn. Upon deletion of this amendment the rejections may be reinstated and it is expected that the next action will be final.

5. Oda et al is cited as prior art of interest for teaching a silicon nitride body where TiN , TiC or SiC may be added in a dispersed form to improve the properties of the sintered body, see column 5, lines 17-25.

6. EP 0592871 is cited as prior art of record for teaching the addition of TiCN particles to a silicon nitride body to improve wear resistance, see example 15.
